PRESS RELEASE

GELEC Wins Sunon Excellence Awards at the DST Presentations Taiwan

Excellent Distributor Award 2010 & Best Growth Rate Award 2008-2010

G. English Electronics Ltd (GELEC) has been working closely with SUNON as their Agent and has been awarded The Excellent Distributor Award 2010 and The Best Growth Rate Award 2008-2010 in recognition of our outstanding performance and sales over the past 2 years.

This is the result of a close partnership which started in 1984, GELEC has the advantage of excellent access to the latest Sunon products and technical information such as the NEW Maglev Super Silence DC, Mighty Mini and Super Green ranges, LED Cooling Modules, traditional AC & DC ranges, radial blowers, power fans and accessories.

Additionally, with GELECS' extensive market experience and Sunons' expert design input, standard items can be modified for both performance characteristics and aesthetic adaptations.

GELEC holds large quantities of a wide range of Sunon products as stock items, enabling a quick and efficient turnaround for UK customers. This is enhanced by Sunons' European Distribution Network, where GELEC has the ability to locate further standard, but non-stock items and deliver to UK customers within a very short delivery time.

GELEC have a very flexible approach to stock and delivery of product, listening to the customer needs and adapting to meet special requirements They also operate buffer agreements and fixed schedules for both standard and bespoke products, enabling next day delivery in most cases and ensuring the optimum price is held over a fixed time scale.

Working with UK based OEM's for research and development, GELEC assists their customers from design concept and pre-production, through to delivery of the final product to manufacturing locations around the world. With offices in London and China, and warehousing in Hong Kong, GELEC are ideally placed to address urgent issues and to avoid time difference delays.

Please contact our sales team sales@gelec.co.uk for further information.
